About me

As a life long learner, I am always looking to learn new things. I love to develop native iOS and macOS apps with Swift using UIKit programmatically or with storyboards. Now with SwiftUI, there are great possibilities to develop apps cross-platform for macOS, iPadOS, tvOS and watchOS using a shared codebase. It is exciting.

Jobs

09/2021 - 03/2022 | Junior iOS Developer in iThinkers

Most of the work was fixing bugs in old and new projects. There was the experience with the network, integration of external API. I was also involved in the build configuration for new projects, sending to the App Store Connect, uploading to the repository to Bitbucket.

- UI bug fix.
- Setting build configuration.
- Setting Firebase.
- Displaying new data in the application.
- Upgrading older versions of customer applications.

Tools: Bitbucket, Jira, Firebase, Postman, App Store Connect.
